WORK EXPERIENCE

Five to Nine (<https://www.fivetonine.co>)

CTO, (April '20 - Present, Remote)

- Responsible for hiring, managing and leading product team; Rails 6 API, React, PG, AWS
- Revamped engineering team from off-shore contractors to US-based full time employees
- Responsible for ensuring quality security measures and leading security reviews with clients and vendors
- Led initiative to increase code quality by raising code coverage to 95% and documenting 100s of test plans
- Led product team through 6 month redesign, re-architecture, and rebuild of the entire platform
- Built many key features and led development on key integrations including Slack, G-Suite, and Zoom
- Part of executive team actively contributing to the strategic direction of the company

Publicis Media (<https://www.publicisgroupe.com/en/services/services-publicis-media-en>)

Senior Full Stack Engineer, (June '18 - April '20, Chicago, Illinois)

- Senior core contributor on 5 person dev team; Angular 8, Rails 5, Redux, Flexbox, PG, AWS
- Built backend API with authentication that allowed Data Engineering team to update data coefficients
- Refactored tab config from being static on the front end, to being dynamically created on the backend allowing clients to create custom tabs and empowering user preferences.
- Built a responsive stacked bar chart component with dynamic data, tooltips, and a legend
- Time Spent in Angular/Javascript: 65%, Ruby/Rails: 35%

The Difference Engine (<https://www.thedifferenceengine.io>)

Volunteer - Tech Lead, (June '19 - Feb 2020) Architect (Feb 2020 - April '21, Chicago, Illinois / Remote)

- Led rotating team of 10 apprentices on multiple project; Python, React, Node, PG, Bootstrap, Heroku
- Promoted from Tech Lead to Architect; became responsible for technical direction and managing tech leads
- Spend 7 hours a week mentoring apprentices through pair programming, code reviews, career development, 1 on 1s
- Led software architecture, scrum meetings (standups/retros), and groom stories with Product Manager
- Responsible for staffing project with new apprentices and tech leads; leading the interview process
- Led us through the COVID-19 pandemic pivoting the program from an in-person program to being fully remote

Gamut - A Grainger Company (<http://www.gamut.com>)

Senior Full Stack Engineer, (Dec '16 - June '18, Chicago, Illinois)

- Recruited and hired by CTO of previous employer (Enova); one of the first hires on engineering team
- Helped build our Customer Service App from scratch (React), while being a key contributor to backend Customers/Orders management system (Ruby/Rails)
- Recognized by leadership two times for monthly engineering award; 1st time for fixing key bugs in lead up to launch; 2nd time for optimizing daily jobs built in Node by reducing complexity and failures
- Mentored junior developers on code and culture through pair programming, intensive code reviews, 1 on 1s
- Time Spent in Javascript: 65%, Ruby/Rails: 35%

SidePrize (<http://www.sideprize.com>)

Head of Engineering, (Jan 2016 - Dec '16) Senior Software Engineer, (May '15 - Dec '15) [100% REMOTE]

- Employee #1; Rails 4+, Ruby 2+, Rspec, PG, JavaScript, Capistrano, SideKiq, Linode, Bootstrap
- Only Full Time Engineer on the team, responsible for the entire functionality of web app
- Built and documented API that was used by contractor to build the Mobile App
- Built 7 integrations with Fantasy Sports Providers via APIs / Scrapping. Integration development involves

pulling the data of the users fantasy team, league, schedule, and scoring.

- Built Background Jobs to fully automate scoring and settling of challenges
- Built Payment Gateway System allowing users to make deposits via credit cards / PayPal on site
- Technical voice in dealings with prospective and current partnership deals
- Time Spent in Ruby/Rails: 85%, Javascript: 15%

Enova (<http://www.enova.com>)

Sr. Software Engineer, (Oct '14 - June '15) Software Engineer, (Aug '13 - Sep '14, Chicago, Illinois)

- Tech Lead on 4-person agile development team, responsible for multiple Products and Internal Tools
- Work with Rails 4+, Ruby 2+, PG, JavaScript, EmberJS, Cucumber, Rspec, Jenkins, Bootstrap, SASS
- Lead developer on new CMS. Backend is an API delivered as a Rails Engine, and the Front End is a UI built in Ember. The backend is Open Sourced and can be seen at www.github.com/enova/landable
- Worked on redesign of PoundsToPocket and CashNetUSA; goal was to make sites more mobile friendly, extract apps away from a monolithic code base, and integrate sites with new CMS.
- Led the integration of Adobe Analytics into multiple products
- Lead developer on Compliance team for QuickQuidFlexCredit in integrating with new FCA standards
- Created and was leader of Culture Guild; focused on improving culture within the R&D department
- Time Spent in Ruby/Rails: 65%, Javascript: 25%, CSS: 10%

G2 Crowd (<http://www.g2crowd.com>)

Software Engineer (August '12 – July '13, Highland Park, Illinois)

- Employee #1; Member of 4-person agile development team
- Technology stack included Rails 3.2, Ruby 2.0, Heroku, AWS, PostgreSQL, Rspec, Circle CI
- Built “Best Software Reviews” feature to show users the best products and best review in chosen categories
- Built Company Admin allowing company to see metrics, data in real time
- Worked alongside Product Manager to effectively make SEO optimizations, and increase page rank of key terms

EDUCATION

University of Wisconsin-Madison, Madison, Wisconsin (Bachelor of Arts, May 2011)

Double Major: Economics & Communication Arts (Communication Science & Rhetorical Studies)

University of Sydney, Sydney, Australia (Spring 2010, Study Abroad)

University of Virginia: Semester at Sea (Summer 2009, Study Abroad)

The Starter League (April '12 – July '12, Chicago)

The Starter League was an immersive 12 week program that introduced me to Ruby On Rails/Javascript

- Winner of in-house Hackathon with AStoryOrTwo (<http://github.com/dkaplan88/astoryortwo>)
- Built a website aimed at spreading the beauty of the high five (http://github.com/dkaplan88/high_five_app)
- Built a website that showed local volunteer opportunities with a social component. I presented MVP to audience of 300+ people for Demo Day (<https://github.com/dkaplan88/Voluntrme>)
- Blog of my experience, and video of my Demo Day presentation (<http://dkaplan88.wordpress.com>)

OTHER NOTEWORTHY THINGS

Remote Year Participant (<http://www.remoteyear.com> June '15 - May '16)
